GDR SHIPS URANIUM ORE TO USSR FOR PROCESSING

According to a DPA (German Press Agency) dispatch from Bonn, quoting a report of the Federal Ministry for All-German Affairs, uranium mining is the most important phase of the East German armaments industry.

The dispatch states that approximately 300,000 men have been put to work in some 250 uranium mining shafts. The report does not give figures on the total quantity of ore mined. Allegedly, the ore concentrate is shipped to the USSR for processing.
